

INTERACTIVE SUSTAINABILITY PROJECT

TOUCH TO START

WHAT CAN YOU DO?
TAKE THE PLEDGE **243**
UVU.EDU/SUSTAINABILITY

WINDOW TINTING

To ensure the coolness of buildings

SOLAR PANELS

The Capitol Reef Field Station (run almost exclusively on solar power)

LIGHT HARVESTERS

The metal plates on the outside of the library and can be retracted or let down to control light and heat in the library.

WHAT CAN YOU DO? TAKE THE 243 PLEDGE UVU.EDU/SUSTAINABILITY

PLEDGE

I pledge to help reduce my carbon footprint and participate in sustainability efforts at UVU and home. I commit to finding and implementing new ways to reduce my own environmental impact by exploring options in alternative transportation, waste reduction and recycling, appliance efficiency, and awareness of how the decisions I make affect my personal environment and the world as a whole.

I pledge to be more conscious of my own actions and how I interact with the world. I pledge to make conscientious living a part of my life, and to support others in their sustainability efforts as well. Below are ideas of how I can translate this pledge to different facets of my life:

+ ENERGY

FOOD

WATER

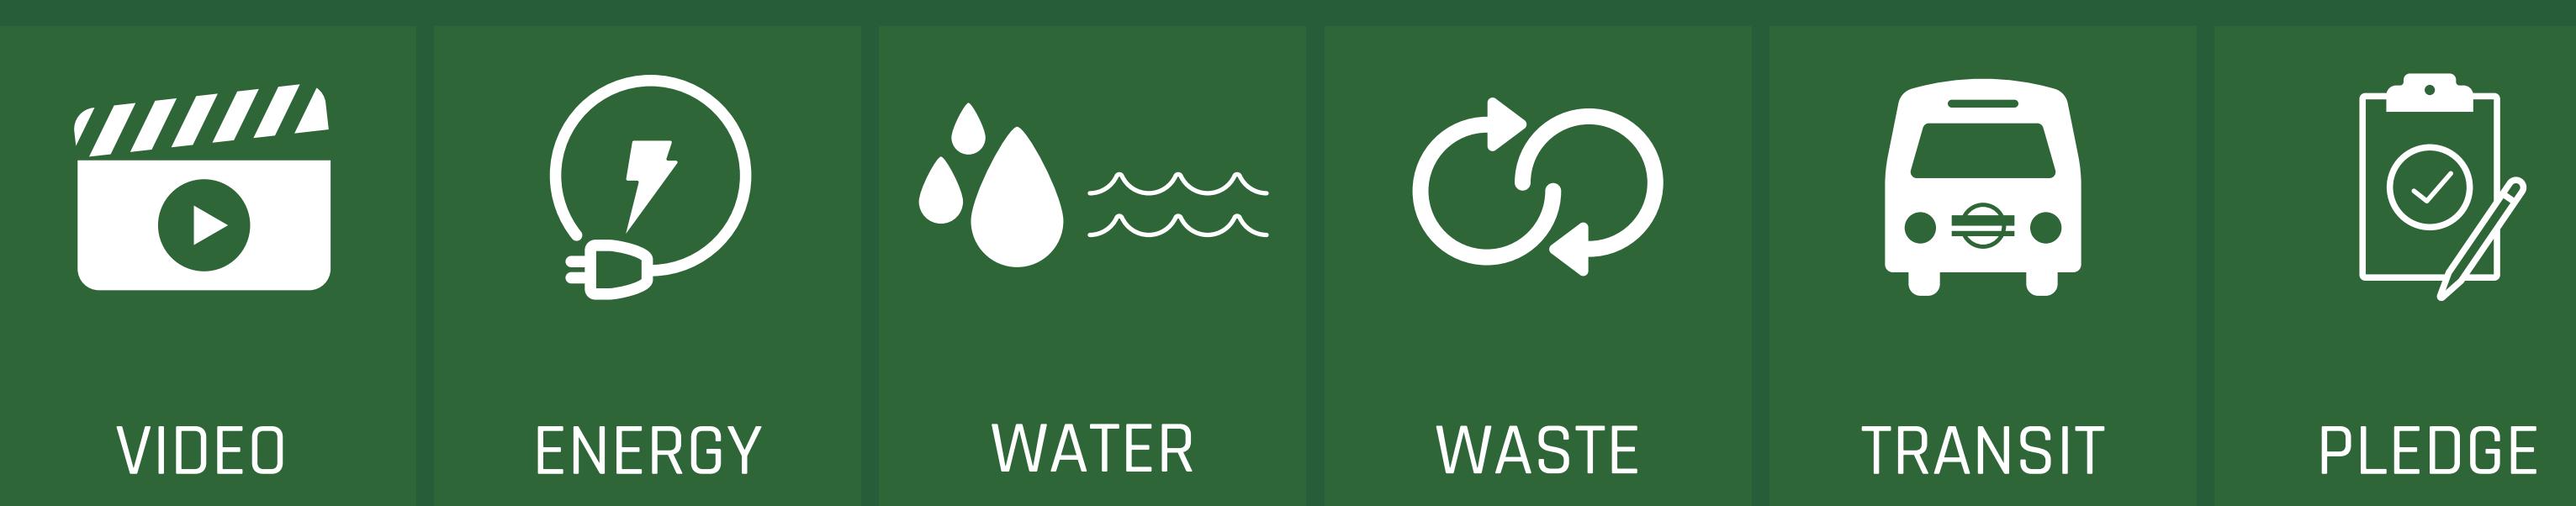

- I will take shorter showers, wash clothes using the cold water setting, and minimize water use when brushing my teeth and washing my hands and dishes.
- I will report leaking faucets and sprinkler systems to Facilities Management.
- I will carry a reusable water bottle.

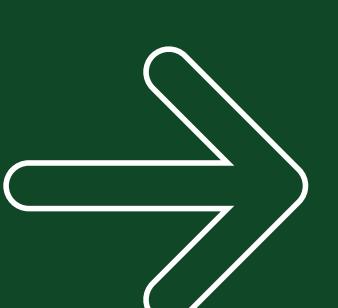

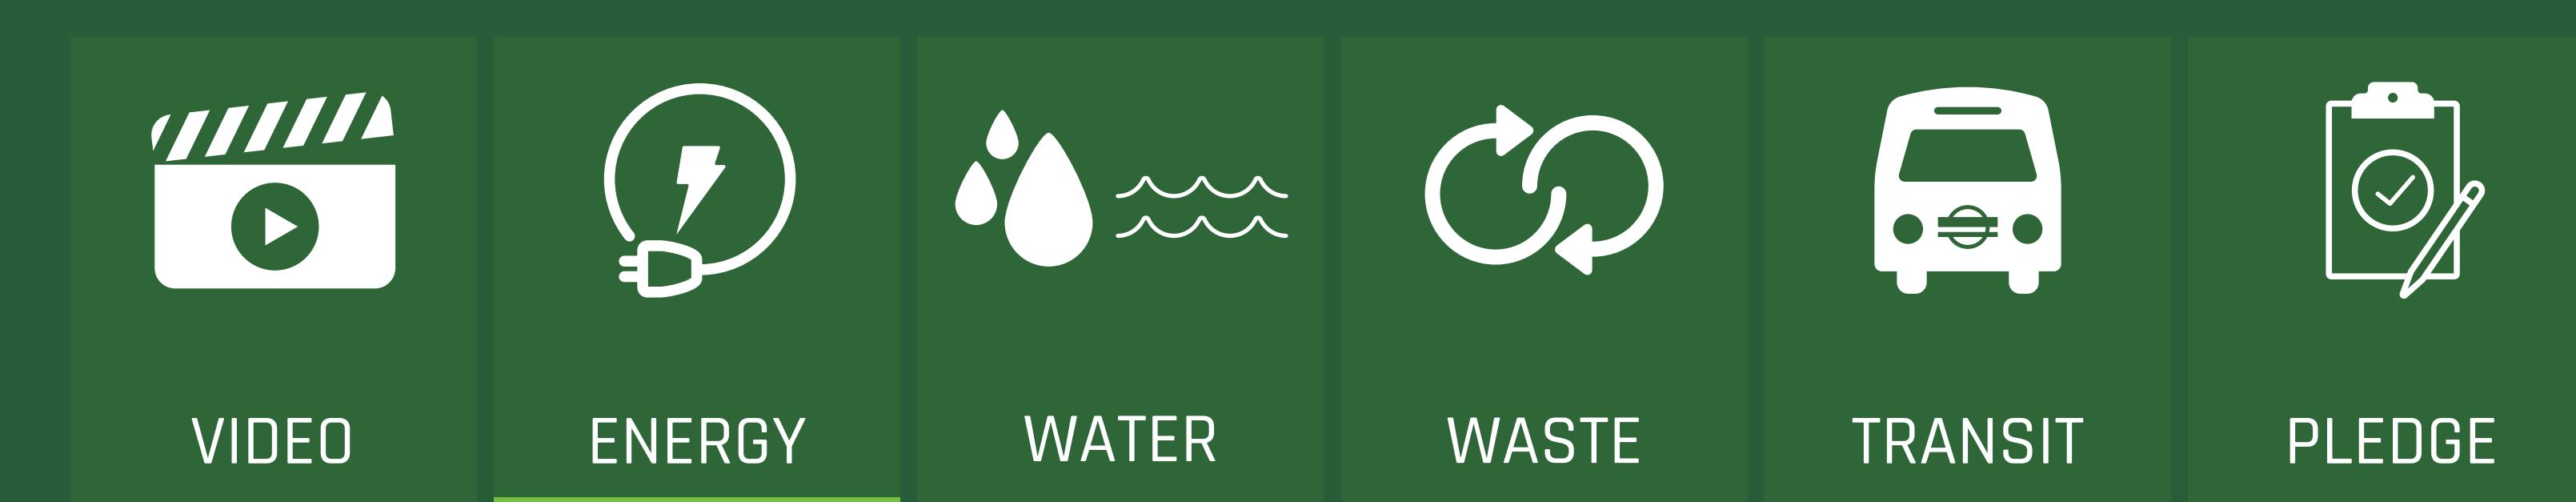

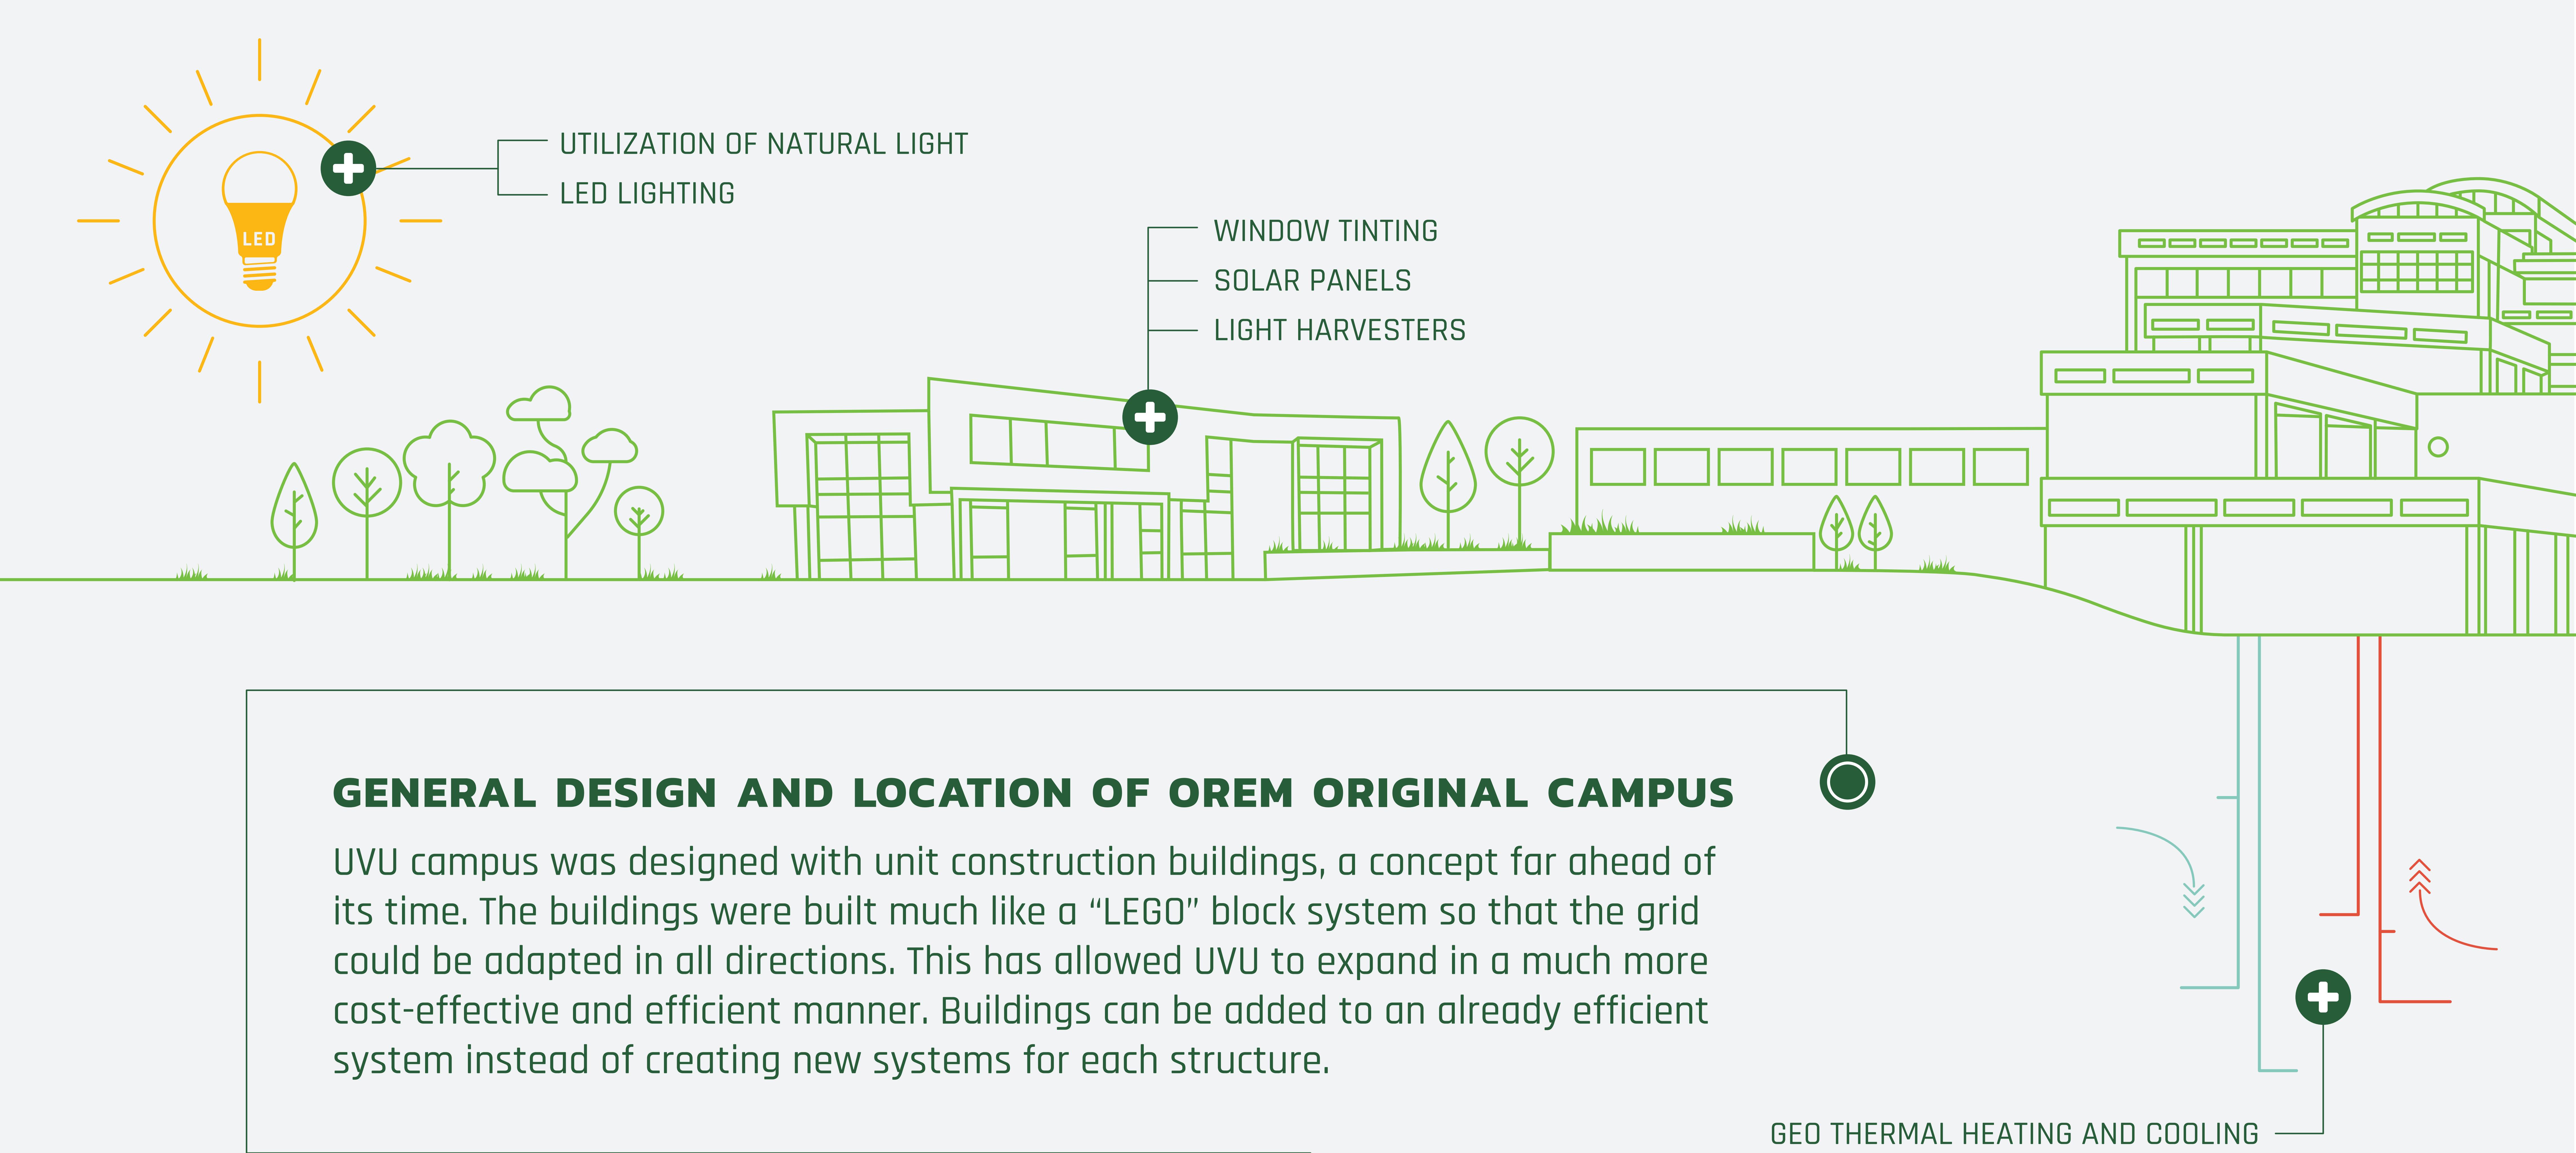

TRANSPORTAION

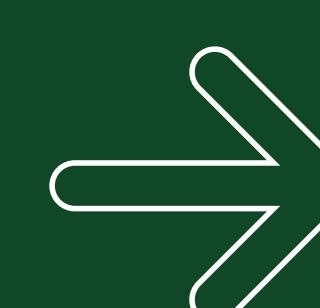

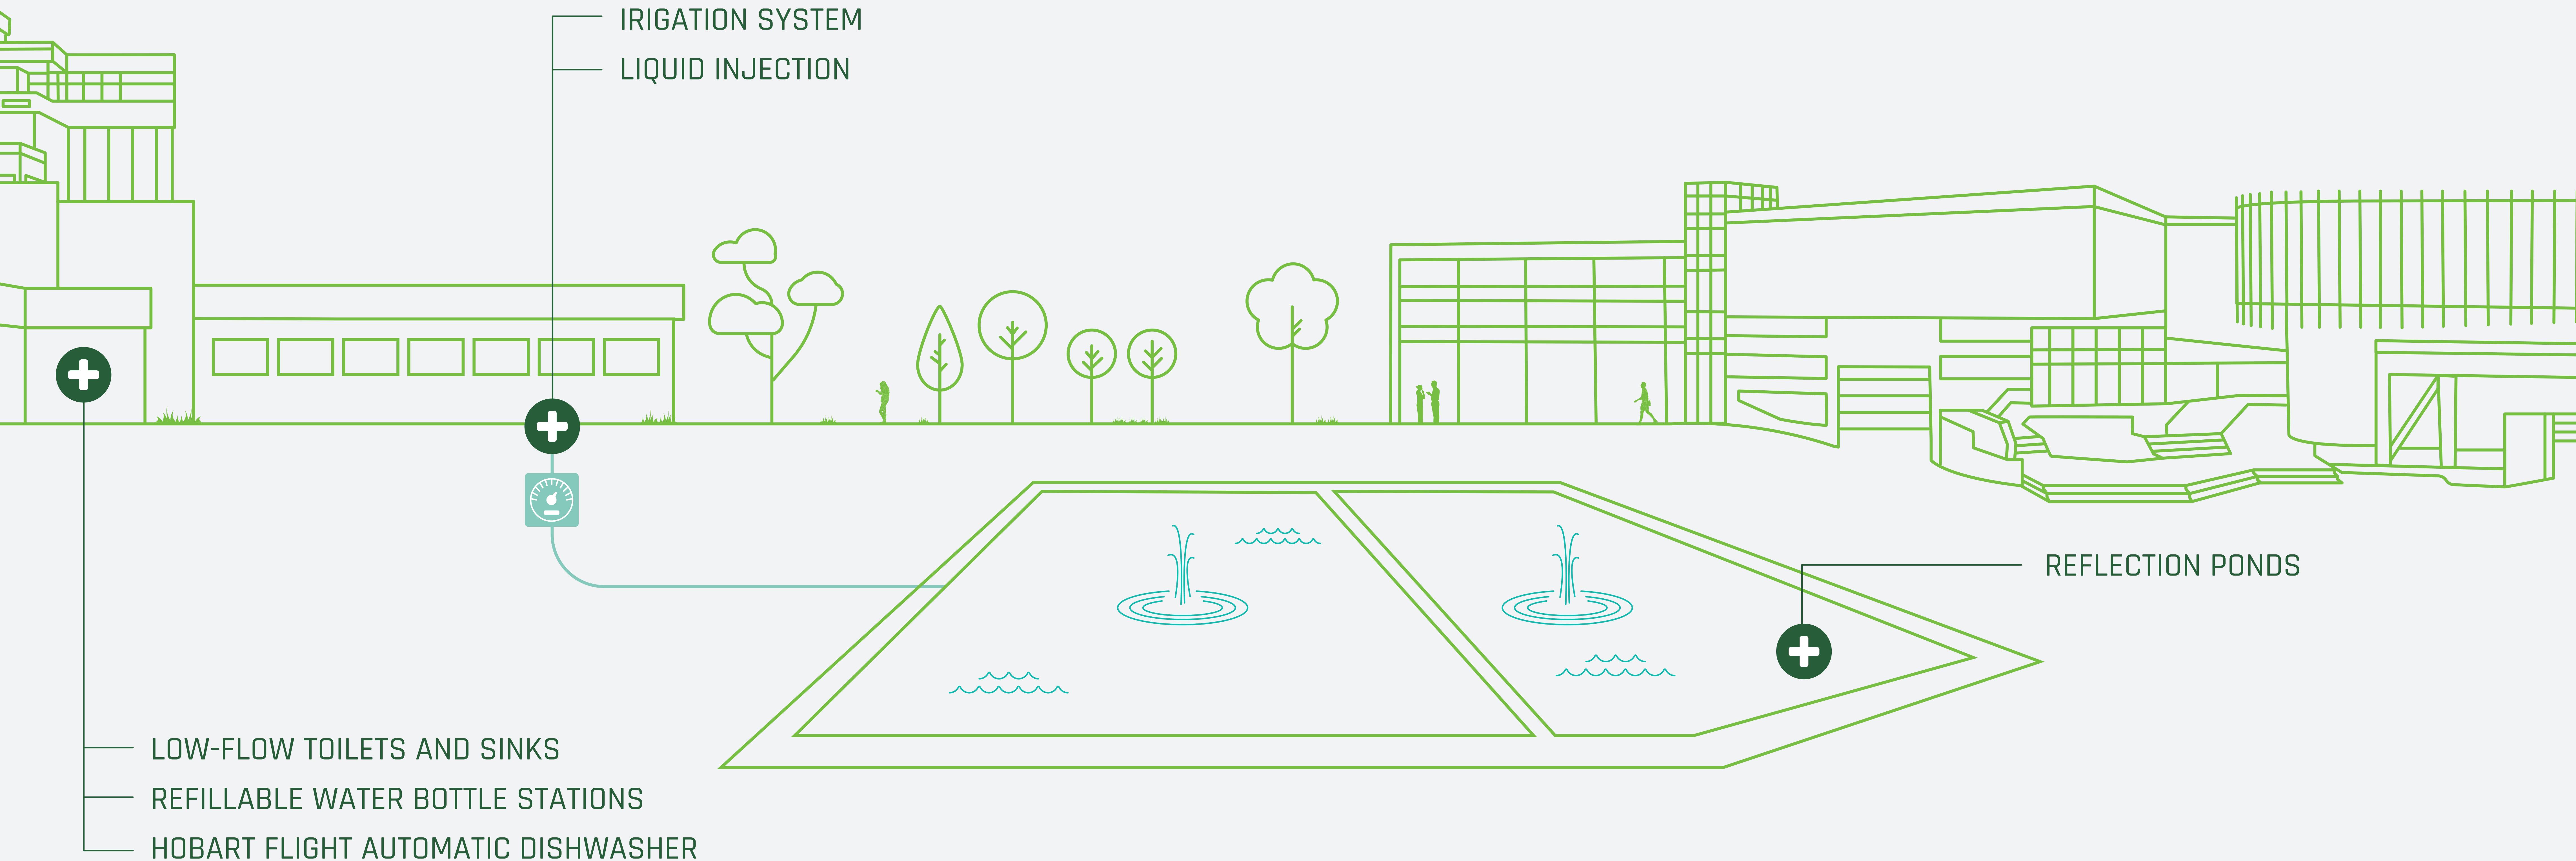

+ WASTE

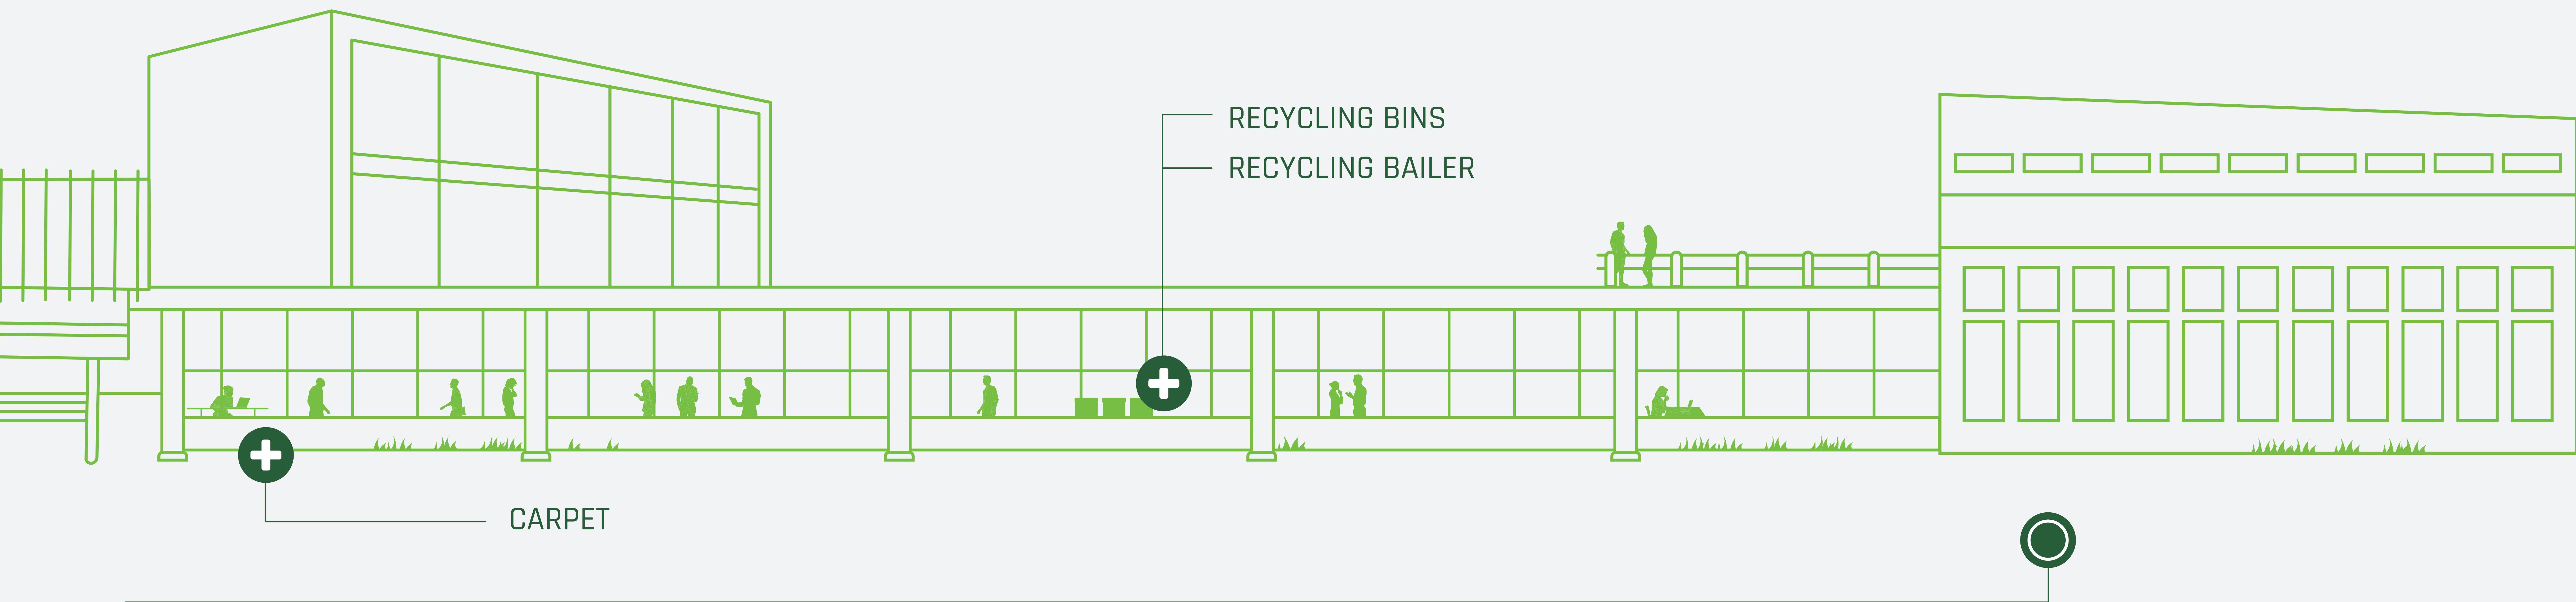

SOCIAL

PLEDGE

SURPLUS SALE

UVU's "surplus sale" is held roughly once a month and reduces UVU's impact on local landfills by increasing the lifespan of equipment and allowing the public to reuse old material.

DEEP FRY OIL

UVU Dining Services partners with a local corporation to recycle the used deep fry oil into animal feed. This creates at least one reason to feel good about eating UVU fried food.
